

Nama : Yoga Aditama

NIM : 1900018009

PWD Rabu 07.30

Kegiatan

1. Laporkan dan jelaskan hasil tampilan pada website dan database dari setiap pelaksanaan praktikum

Jawab

Tampilan database

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
<input type="checkbox"/>	1 id_user	varchar(50)	utf8mb4_general_ci		No	None			Change Drop More
<input type="checkbox"/>	2 password	varchar(50)	utf8mb4_general_ci		No	None			Change Drop More
<input type="checkbox"/>	3 nama_lengkap	varchar(100)	utf8mb4_general_ci		No	None			Change Drop More
<input type="checkbox"/>	4 email	varchar(100)	utf8mb4_general_ci		No	None			Change Drop More
<input type="checkbox"/>	5 level	varchar(50)	utf8mb4_general_ci		No	None			Change Drop More

Isi table users

		id_user	password	nama_lengkap	email	level
<input type="checkbox"/>	Edit Copy Delete		d41d8cd98f00b204e9800998ecf8427e			
<input type="checkbox"/>	Edit Copy Delete	yoga	d1971f8454ef009fcee26fffa3c0794e	Yoga Aditama	yoga.a8765@gmail.com	

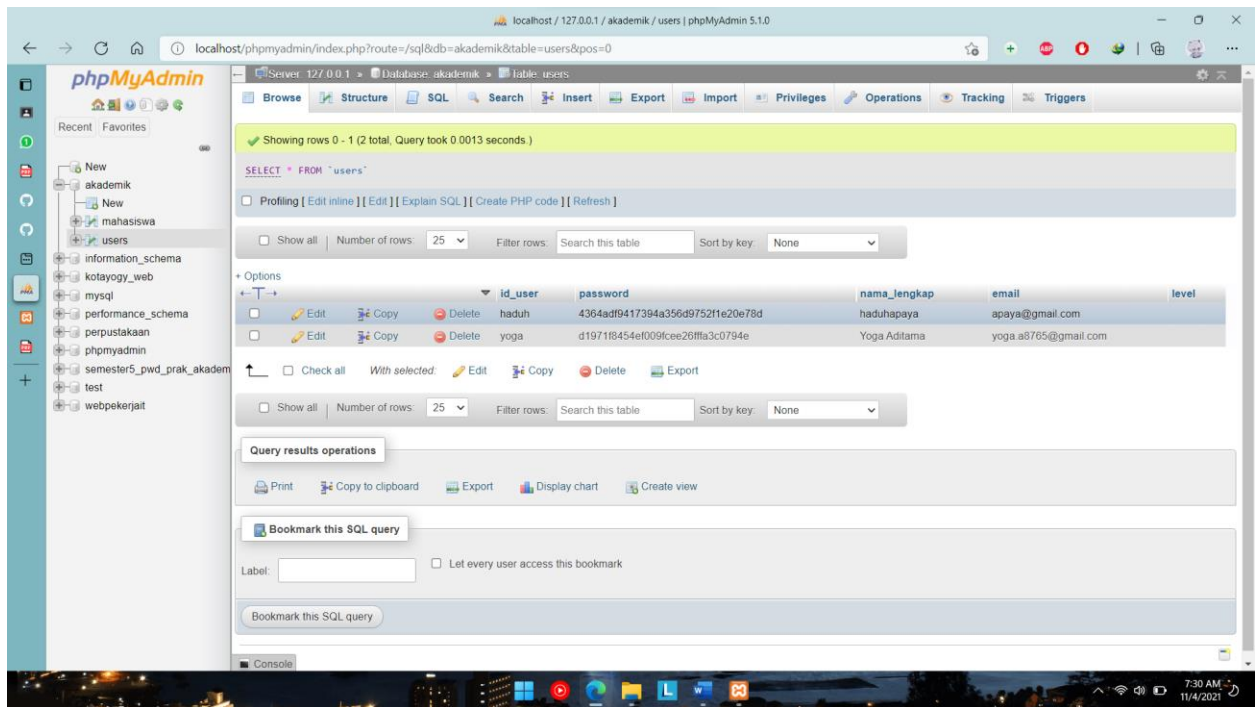

Menjalankan form_user.php untuk menginputkan data baru

The screenshot shows a web browser window with the address bar displaying 'localhost/pwd/pertemuan%205/form_user.php'. The page title is 'Tambah User'. The form contains the following fields and values:

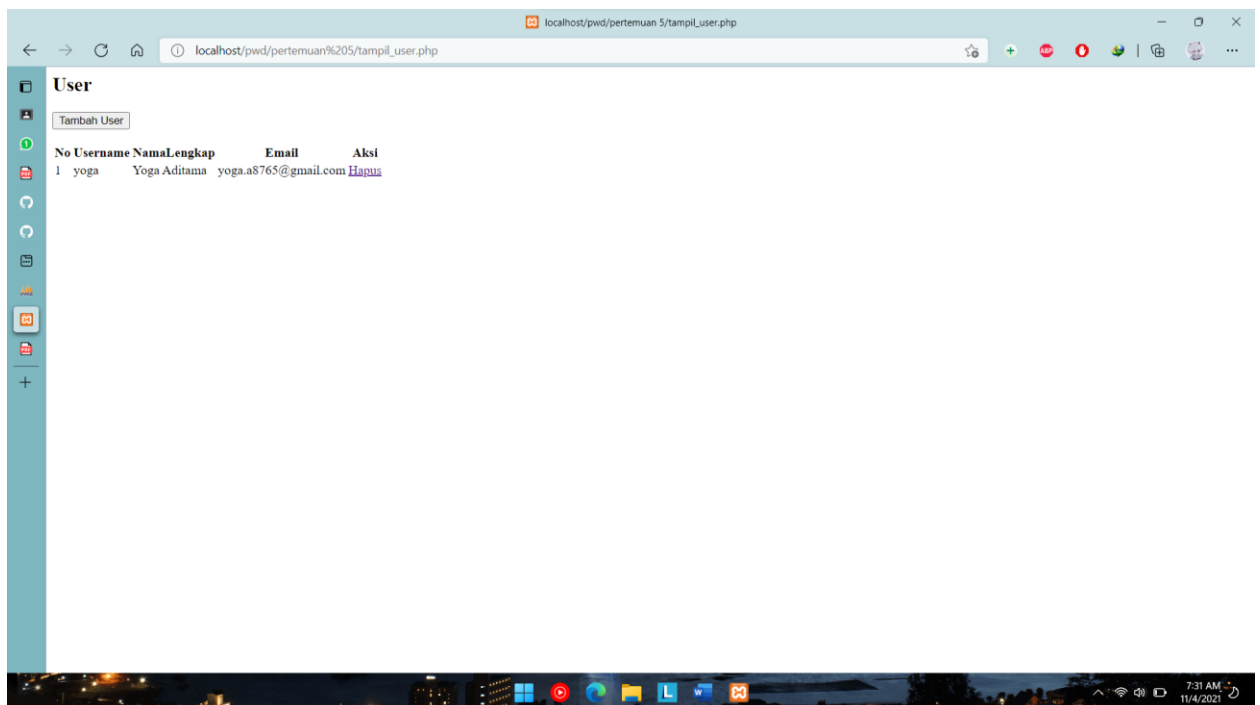

- Username: haduh
- Password: (masked with dots)
- Nama Lengkap: haduhapaya
- Email: apaya@gmail.com
- Level: 1

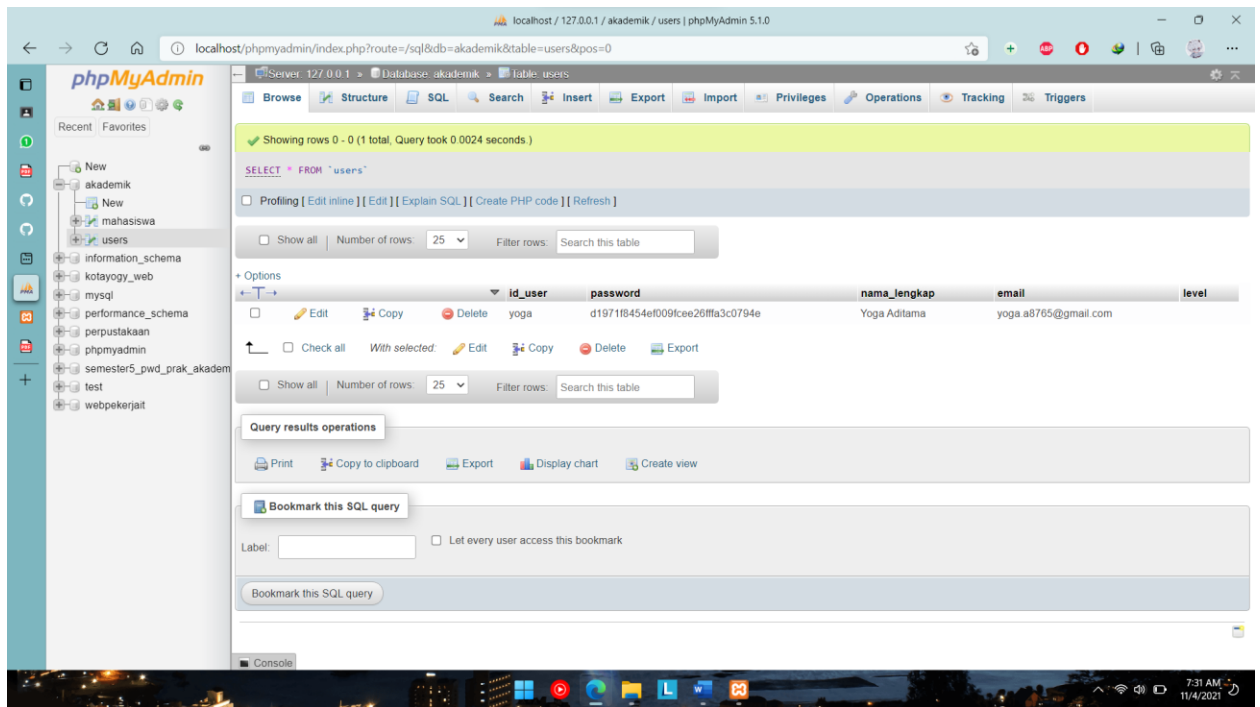

A 'SIMPAN' button is located below the form fields. The browser's taskbar at the bottom shows the time as 7:29 AM on 11/4/2021.

Table user pun isi nya akan bertambah

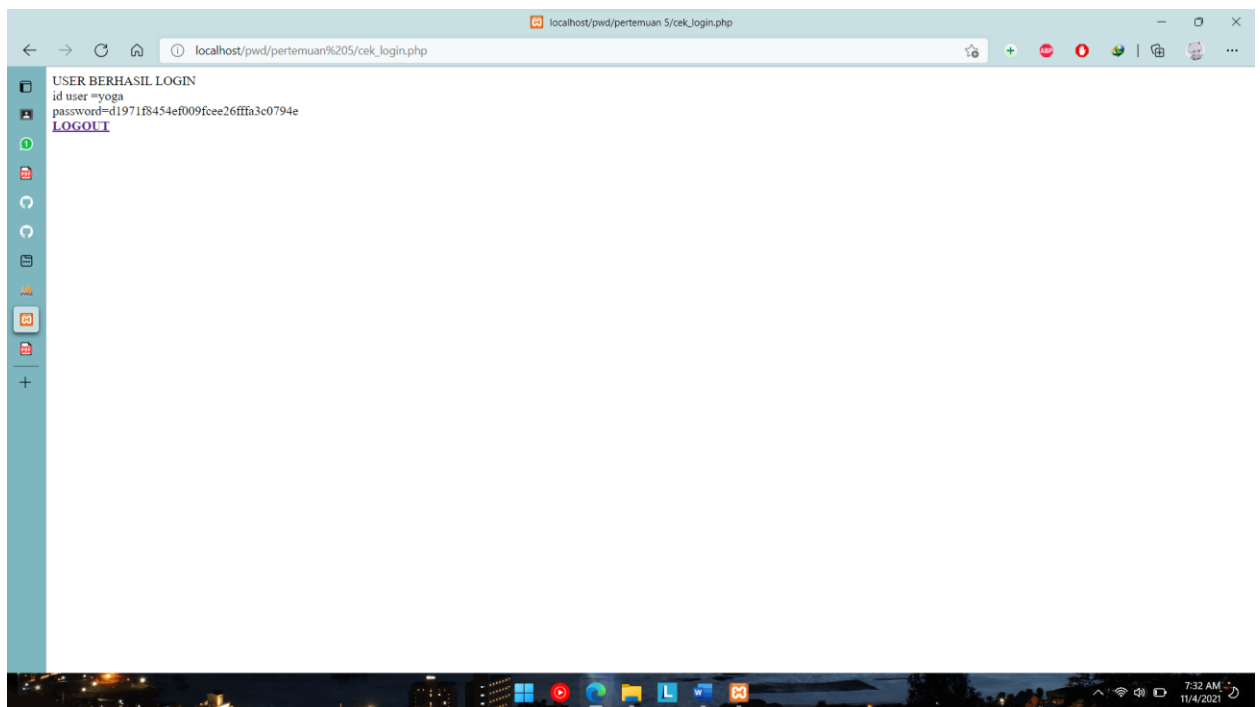

Ketika meengklik hapus, maka data akan terhapus dari data base

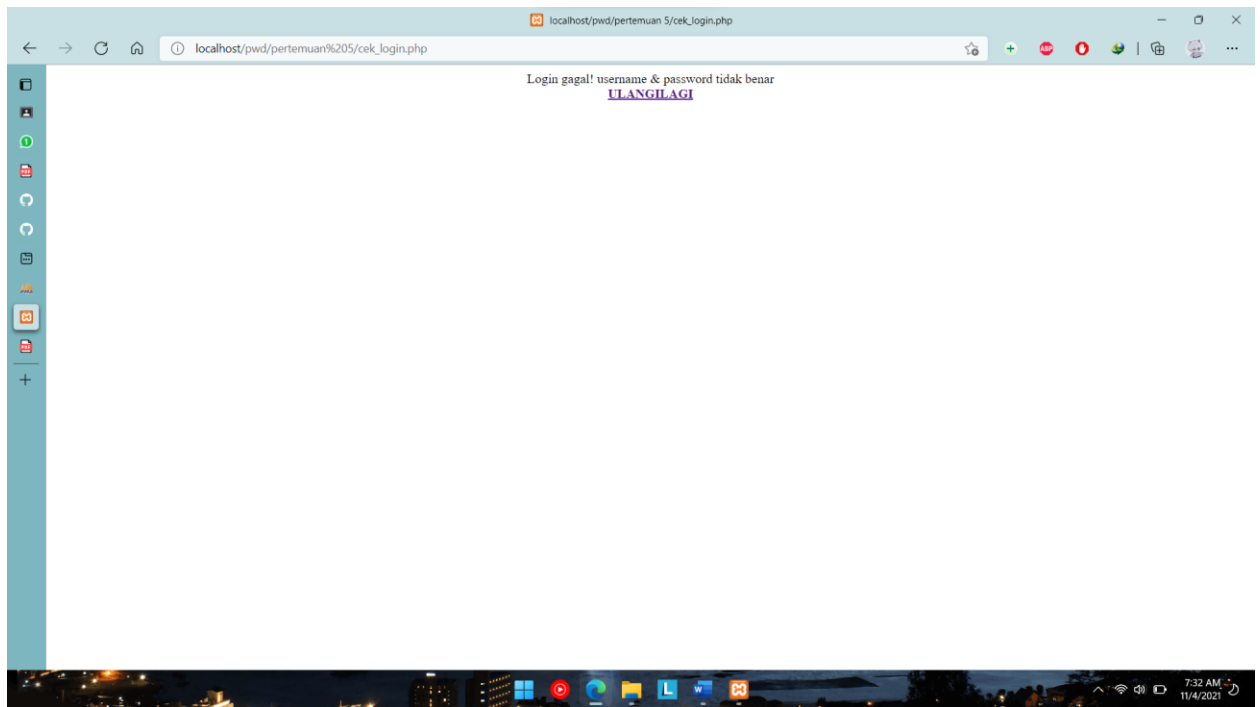

Melakukan login di form_login.php

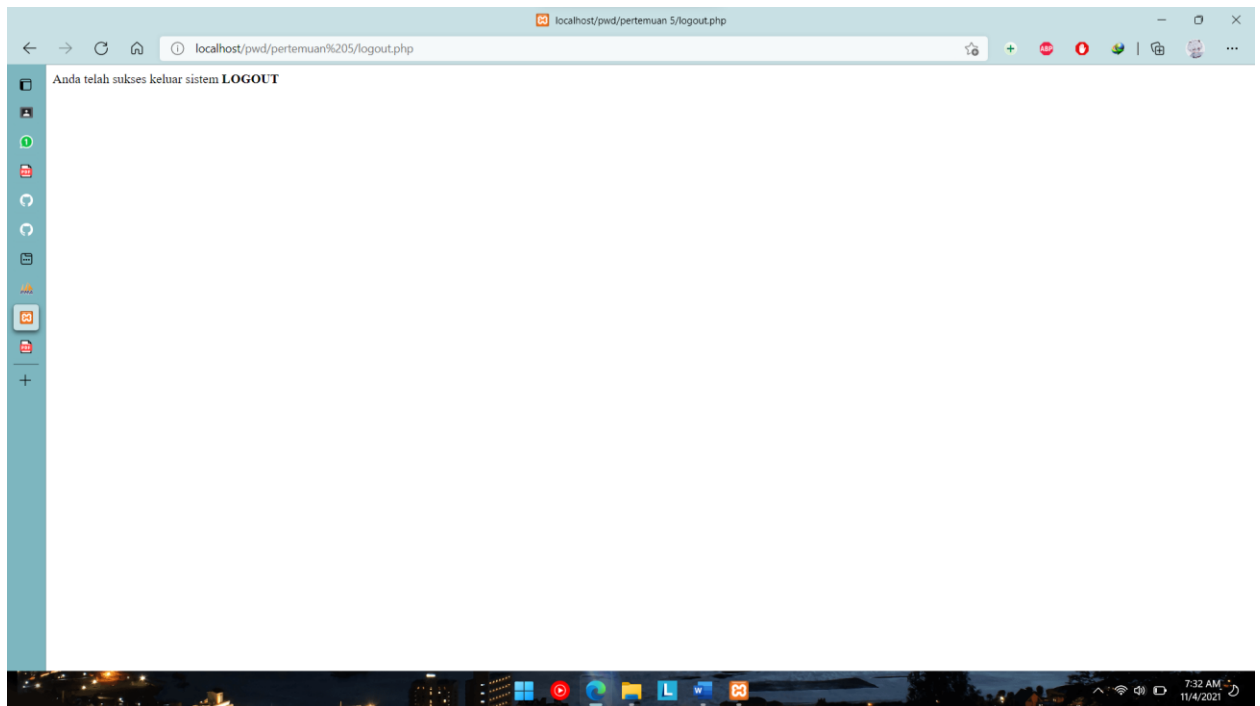

Jika berhasil

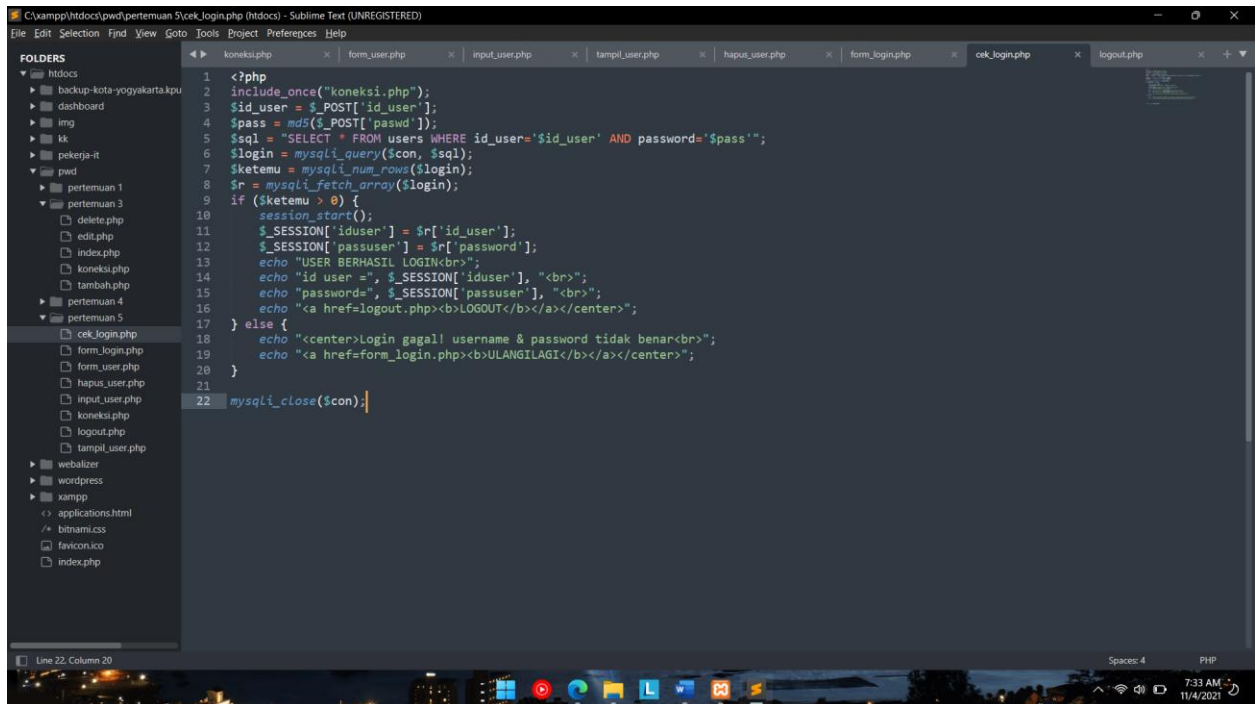

Jika gagal

Jika logout

2. Jelaskan sintaks PHP dari pelaksanaan praktikum session

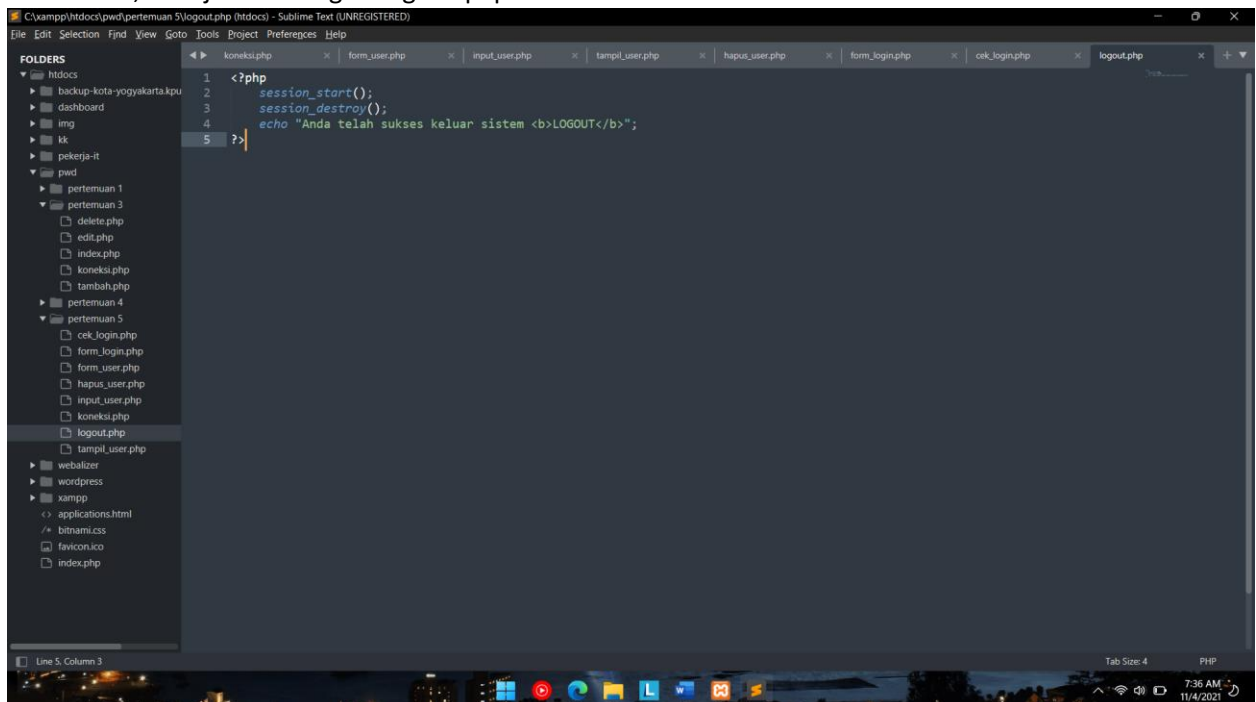

```
1 <?php
2 include_once("koneksi.php");
3 $id_user = $_POST['id_user'];
4 $pass = md5($_POST['paswd']);
5 $sql = "SELECT * FROM users WHERE id_user='$id_user' AND password='$pass'";
6 $login = mysqli_query($con, $sql);
7 $ketemu = mysqli_num_rows($login);
8 $r = mysqli_fetch_array($login);
9 if ($ketemu > 0) {
10     session_start();
11     $_SESSION['iduser'] = $r['id_user'];
12     $_SESSION['passuser'] = $r['password'];
13     echo "USER BERHASIL LOGIN<br>";
14     echo "id user =", $_SESSION['iduser'], "<br>";
15     echo "password=", $_SESSION['passuser'], "<br>";
16     echo "<a href=logout.php><b>LOGOUT</b></a></center>";
17 } else {
18     echo "<center>Login gagal! username & password tidak benar<br>";
19     echo "<a href=form_login.php><b>ULANGILAGI</b></a></center>";
20 }
21
22 mysqli_close($con);
```

Pada code ini, session_start() berfungsi untuk memulai session.

\$_SESSION['nama_session'] merupakan awalan Ketika kita membuat variabel session, dalam session ini menyimpan id_user dan password

Setelah itu, dilanjutkan dengan logout.php

```
1 <?php
2 session_start();
3 session_destroy();
4 echo "Anda telah sukses keluar sistem <b>LOGOUT</b>";
5
```

Session_destroy() akan menghapus session yang ada.
